

The first time you use a Garland Rawhide Mallet, you'll notice a difference. Not only will it deliver superior results, but it will make your job easier. That's why Garland rawhide mallets and hammers are preferred by both craftsmen and production workers in a wide range of industries. They are the mallets and hammers of choice for everyone from die-makers and foundry workers...to jewelers and woodworkers...to manufacturers of electrical appliances and motors.

### Superior Quality For Superior Results

Garland Rawhide Mallets are constructed from the finest materials and workmanship. They are assembled by skilled craftsmen who specialize in non-marring striking tools. All Garland products are manufactured in the U.S.A.

Garland's unsurpassed quality is further assured by ISO 9002 procedures – the international standard for excellence. Because of their high quality, Garland products deliver the high-quality results you require in your finished products.

### More Than A Century As A Leading Source

Garland Manufacturing has been providing America with rawhide products since 1866. Today, the company is the nation's leading supplier of non-marring rawhide mallets and hammers to the industrial marketplace.

When you buy from Garland, you'll know you're getting the industry's preferred rawhide mallet. The superior quality, selection and value you get from Garland make the manufacturer the only source you need.

Non-Marring  
Mallets & Hammers.

The Preferred

Striking Tools For  
A Wide Range Of  
Industries.

Garland Manufacturing has been producing mallets and hammers since 1866. Located in Saco, Maine, the company manufactures rawhide and plastic mallets and hammers in a variety of sizes.

## Your Industry...

Garland uses only the finest materials and workmanship in its products. That's why Garland non-marring mallets and hammers are the striking tools of choice for craftsmen and production workers in a wide range of industries. They are the mallets and hammers preferred by everyone from die-makers and jewelry-makers to foundry workers and woodworkers, as well as by manufacturers of electrical appliances and motors.

# & Garland

Your tools can make or break the appearance of your products. Garland non-marring mallets and hammers are designed to deliver powerful, controlled blows without damaging work surfaces. Because they will not scratch, mar or spark, these soft-faced tools are ideal for use on broad-faced striking surfaces in a wide range of applications.

When you buy from Garland, you'll know you're getting North America's preferred rawhide and plastic mallets and hammers. The superior quality, selection and value you get from Garland make the manufacturer the only source you need.

*Warning: Protect your eyes! Always wear safety goggles when using striking tools.*

## GARLAND PRODUCTS

**Rawhide Mallets** – Garland's all-rawhide mallets are hand-crafted from the finest water buffalo hides and hickory handles. These tough, long-wearing tools will not damage steel, iron, brass, aluminum, gold, silver or other soft metals.

**Weighted Rawhide Mallets** – Designed with extra strength, Weighted Rawhide Mallets are for heavier-duty applications where a heavier tap or strike is necessary. The added weight gives the user a heavy, balanced blow without scratching work surfaces.

**Gar-Dur™ Plastic Mallets** – Made from Garland's own Gar-Dur ultra-high-molecular-weight plastic, these mallets also deliver non-marring results. The nonporous material is tough, easy to clean and will not delaminate.

**Elastomer Mallets** – Garland elastomer mallets are used in a wide variety of applications. They are constructed from an advanced resin material for long-lasting durability.

**Dead-Blow Hammers** – Soft-faced Dead-Blow Hammers are made of hot-cast polyurethane for outstanding elasticity. The custom-formulated material also gives the hammers a self-healing feature that makes them resistant to dents, abrasions and cuts.

**Solid-Head Hammers with Rawhide Faces** – Also known as "Machinist's Hammers," these tools are designed for general-purpose applications and assembly work. Like Garland Rawhide Mallets, they are ideal for delivering controlled, non-marring blows on a variety of materials.

**Split-Head Hammers** – This hammer does the work of five different tools because the faces can be easily changed. You can switch between rawhide, copper, urethane, nylon and Gar-Dur plastic faces depending on the application.
